

March 16, 2022

Hello Neighbours,

We hope you have been well since our last communication about the Wheatland Wind Project in November of 2021.

The Wheatland Wind Project Team is preparing for a busy and exciting year ahead at the Project site. Our contractors are planning to mobilize in late March to the site to recommence construction activities. The following is a high-level schedule of key activities in 2022, which may be altered by ongoing supply chain and shipping availabilities. We will notify you again if the schedule changes significantly in the future.

- Completion of Access Road Construction – April through June
- Turbine Foundation Installation – April through August
- Turbine Deliveries and Erection – June through September
- First Turbine Starts Operating – July/August
- Construction Clean-up – September through November
- Project Full Operational – November/December

Throughout construction, and notably over the summer when turbine components are planned to be delivered to site, there will be increased traffic on the roads. Our haul routes map for turbine component deliveries is available on our website at [www.wheatlandwind.com](http://www.wheatlandwind.com).

Our on-site Construction Manager has changed from Juergen Kraus to Silvio Martinez. Silvio's contact information is below. We understand that many of you have close relationships with Juergen, but we are confident that Silvio will exceed your expectations.

We will host another open house in June and details will be provided on the project website and posted in the local newspaper.

Thank you for your ongoing cooperation, accommodation and support for the Wheatland Wind Project. We are excited for the year ahead and look forward to hearing from you with any questions or concerns. Please reach out to our Project Manager or Construction Manager at any time.
